

YOUR USED RESCUE PARACHUTES

CAN STILL SAVE LIVES!

SUPER VERSATILE AIRDROP SYSTEM SVAS

SVAS is a project of the **Humanitarian Pilots Initiative** (HPI). Our aim is to provide air support in natural disasters and crisis situations by enabling the rapid deployment of humanitarian aid.

Too often, essential humanitarian supplies get stuck, lost or seized on the way due to missing or damaged infrastructure or political instability.

Your rescue parachutes connected to our system enable the safe and rapid delivery of relief supplies. We can drop all types of cargo: food, water treatment units, medicines, medical equipment, ...

Give your rescue parachutes a second life!
